

KATYA IVSHINA

HARVARD PHD STUDENT
ACADEMIC INFLUENCER

ABOUT

Katya is a Boston-based academic influencer and a PhD student. At 17 she moved to the US alone to study Mathematics at Princeton and is now an Applied Mathematics PhD student at Harvard.

Katya cares deeply about increasing access to education and empowering underrepresented students in STEM. She has worked with companies such as Jenni AI, Mindgrasp, Unriddle, and Juni Learning.

Her experience taught her the importance of perseverance and optimism and she believes in inspiring others to pursue their academic dreams through her personal story. As a first-generation immigrant in the US and a woman in STEM, Katya shares all aspects of her life on social media with genuine candor, which has amassed her over 95 thousand followers. While off-duty, Katya loves to unicycle, listen to music, and play with her puppy.
